

Renal Drug Database access workaround (SNSWLHD and MLHD users)

The issue with Renal drug database is being caused by **uBlock Origin Lite** browser extension. This can be disabled for that specific website by following the below instructions.

1. Go to the website - <https://www.renaldrugdatabase.com.acs.hcn.com.au/>
2. Click on the puzzle piece for the extensions and then the **uBlock Origin Lite** button

3. Move the slider from **Optimal** to **no filtering**

4. Refresh the page and the website no longer has filtering on
